

Five Reasons Data Centers Rely on TNSR

High-Speed Routing & NAT

- Delivers 10G–100G+ throughput - scales with hardware
- Line-rate packet processing with VPP
- Handles massive numbers of concurrent sessions

Deployment Flexibility

- Runs on Netgate systems or cloud (AWS, Azure)
- Same features across all environments
- Software updates enable new capabilities

Robust Security

- Stateful firewall protection
- IPsec and WireGuard VPN
- IDS/IPS integration for advanced defense

Proven Reliability

- 24/7/365 Technical Assistance
- Professional service consultations
- Fast time to resolution

Cost Effective Advantage

- Lower TCO than legacy solutions
- No per-session or bandwidth licensing fees
- Investment supports open source innovation
